PROFESSIONAL SUMMARY

Senior Full Stack Engineer with 5+ years of continuous experience architecting scalable MERN stack solutions, multi-tenant SaaS platforms, and AI-driven applications. Proven track record in leading technical development, optimizing MongoDB/Node.js backend architectures to reduce API latency by 60% %, and managing production deployments serving 50k+ daily active users. Certified GitHub Copilot professional expert in modern engineering practices, AWS cloud infrastructure, and mentoring cross-functional agile teams.

TECHNICAL SKILLS

Frontend	React.js, Next.js, TypeScript, JavaScript (ES6+), Redux, Tailwind CSS, HTML5/CSS3, Vite
Backend	Node.js, Express.js, REST API Design, GraphQL, JWT, OAuth 2.0, RBAC, Microservices, WebSockets
AI / LLM	GitHub Copilot (Certified), Google Gemini API, scikit-learn, spaCy (NLP), Prompt Engineering
Database	MongoDB (indexing, schema optimization), MySQL, Redis (Caching)
Cloud & DevOps	AWS (EC2, S3, Lambda), Docker, Nginx, GitHub Actions, CI/CD, Linux, GitFlow
Architecture	High-Scale System Design, Multi-tenant SaaS, Graph Algorithms, TDD, Agile/Scrum

EDUCATION

Master of Computer Applications (MCA)	2019 – 2022
Sinhagad College of Engineering, Pune	
Bachelor of Computer Applications (BCA)	2016 – 2019
Pune University	

PROFESSIONAL EXPERIENCE

GladOwl Web Solutions Pvt. Ltd.	
Technical Lead - Senior Full Stack Engineer	Jul 2023 – Present
- Lead architecture for enterprise-grade SaaS platforms, reducing backend response times from 800ms to 320ms through Redis caching and query profiling. - Manage end-to-end deployment of 12+ production MERN applications serving 50,000+ daily active users. - Spearhead company-wide accessibility initiatives, establishing standard checklists and documentation for best-in-class UI/UX. - Automate CI/CD pipelines via GitHub Actions and AWS EC2, slashing deployment error rates by 70%.	
Digital Revolution	
Full Stack Developer (MERN)	Nov 2022 – Jul 2023
- Built a modular React + Redux component library adopted across 4 major projects, cutting frontend development time by 30%. - Delivered 8 MERN applications for EdTech and e-commerce clients, ensuring zero-downtime during peak loads (10k+ concurrent users). - Implemented robust security protocols including JWT, OAuth 2.0, and RBAC to protect stakeholder data.	
Visulon	
Frontend Engineer (React)	Jul 2022 – Nov 2022
Built and optimized highly responsive user interfaces utilizing React.js, JavaScript (ES6+), and Tailwind CSS to improve cross-browser performance.	

- ▶ Collaborated with product design teams to convert high-fidelity Figma mockups into reusable component architectures, boosting frontend consistency.
- ▶ Managed client-side state optimization using **Redux Toolkit** and enhanced DOM rendering pathways for data-heavy application views.

TransPerfect Solutions

Software Engineer (Internationalization & Frontend) Feb 2022 – Jul 2022

- ▶ Engineered internationalization (**i18n**) architectures and enterprise software localization workflows to support multilingual web platform scaling.
- ▶ Integrated automated string extraction pipelines and Translation Management Systems (TMS) within active **CI/CD** and Git workflows.
- ▶ Resolved UI layout shifting, text truncation anomalies, and character encoding issues (UTF-8) across localized product builds to maintain pixel-perfect UX layouts.

Destek Infosolutions Pvt Ltd

Executive Software Developer Apr 2021 – Feb 2022

- ▶ Engineered scalable backend RESTful APIs using **Node.js**, **Express.js**, and **MongoDB** to support high-concurrency database workloads.
- ▶ Refactored legacy schemas, optimized query indexing, and eliminated application performance bottlenecks during the end-to-end **SDLC**.
- ▶ Collaborated within cross-functional teams executing daily **Agile/Scrum** development cycles to ship enterprise platform modules.

KEY PROJECTS

AI-Powered E-Commerce Platform (Veloura World) — *MERN, Redux, AWS EC2, scikit-learn*

- ▶ Built a full-stack e-commerce engine with RESTful APIs for product management, Razorpay integration, and ShipRocket logistics.
- ▶ Optimized MongoDB schemas with indexing and RBAC; achieved sub-200ms API response times via AWS EC2 deployment.
- ▶ Integrated AI-driven product recommendations using **scikit-learn**, boosting user engagement by 28%.

Smart Task Management SaaS — *React.js, Node.js, MongoDB, Docker, WebSockets, JWT*

- ▶ Designed a multi-tenant SaaS tool with dynamic Kanban boards and real-time team collaboration via **WebSockets**.
- ▶ Integrated an NLP-based task priority prediction microservice to suggest task urgency, improving productivity by 22%.
- ▶ Containerized application infrastructure using **Docker** and deployed on a VPS with an Nginx reverse proxy.

CERTIFICATIONS

GitHub Copilot Certification	Microsoft / Simplilearn	2025
MERN Stack Development	Love Babbar / PW Skills	2024
AWS S3	Amazon Web Services	2024

ACADEMIC CONTRIBUTIONS

- ★ **Guest Lecturer, DY Patil University**
Presented industry sessions on scalable MERN architectures, React.js, Node.js, and modern software engineering practices.
- ★ **External Examiner, MIT WPU University**
Reviewed final-year engineering projects and evaluated technical implementations for graduating engineering students.
